Full Stack JavaScript Web Developer Bootcamp

iNeuron

Objective

Shopping Cart

The Objective is to create a simple frontend where there are a **couple of products** and upon **clicking on add to cart button** the **item should be added to the cart** and the **user can see the items added to the cart** on the cart page.

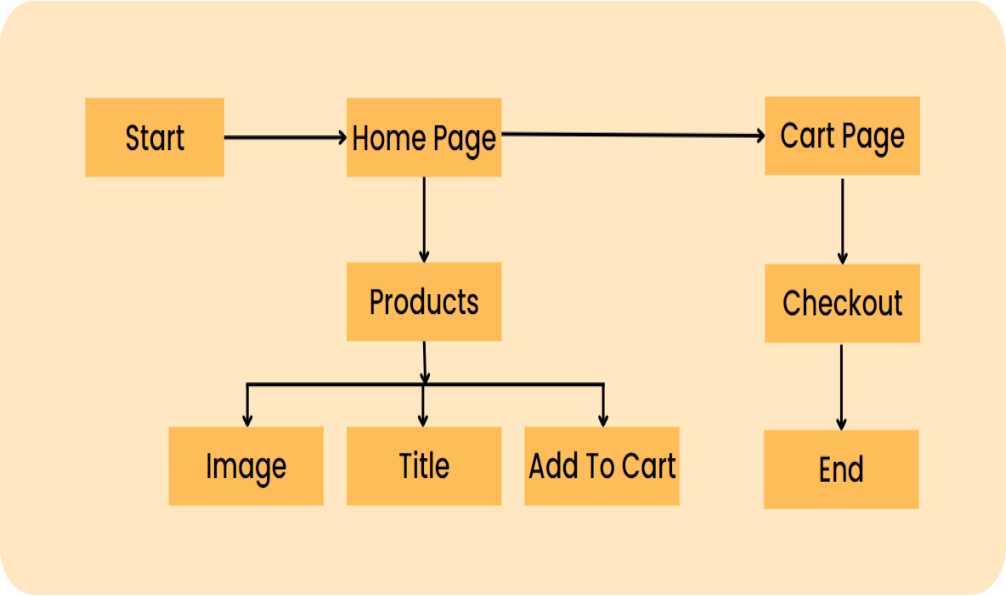
Architecture

iNeuron



Project Execution

Shopping Cart

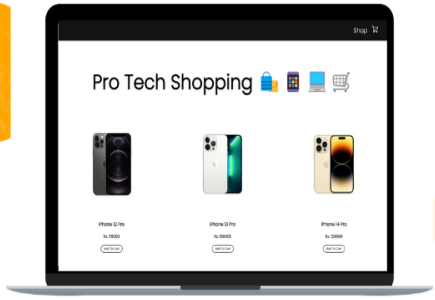
There are two routes mainly:

1. **Home Page("/"):**

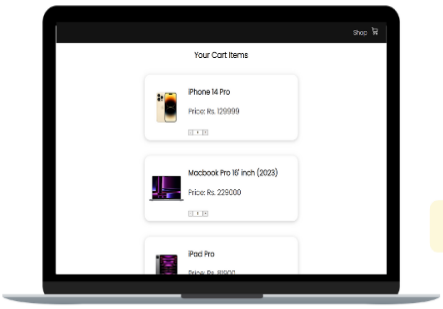
   All the products are listed on the Home Page

2. **Cart Page("/cart"):**

   Can see all the products which are added in the cart



Home Page



Cart

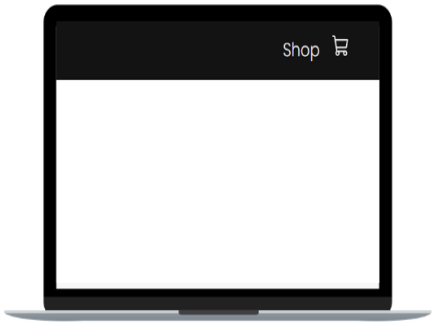
Functions

Shopping Cart

Also one can checkout.

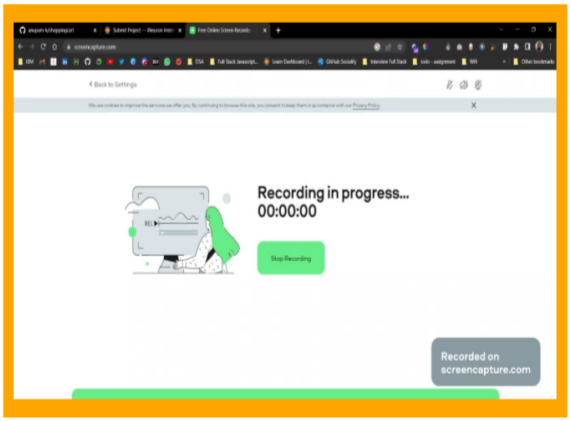
Actually, no payment will be there but the cart items will be vanished once checked out

After checkout, one can again click on **Shop** to buy some products



Cart after checkout

Shopping Cart Demo



Here is a demo video showing the project

Demo Video Link Here: Click Here

- User can add any item listed on the Home Page
- User can see all the selected products in the cart
- Also the quantity of the products can be increased or decreased from the cart or delete

Note: Video Link is given if the video doesn't play here
